STATE GOAL 17: Understand world geography and the effects of geography on society, with an emphasis on the United States.

Why This Goal Is Important: The need for geographic literacy has never been greater or more obvious than in today's tightly interrelated world. Students must understand the world's physical features, how they blend with social systems and how they affect economies, politics and human interaction. Isolated geographic facts are not enough. To grasp geography and its effect on individuals and societies, students must know the broad concepts of spatial patterns, mapping, population and physical systems (land, air, water). The combination of geographic facts and broad concepts provides a deeper understanding of geography and its effects on individuals and societies.

A. Locate, describe and explain places, regions and features on the Earth.

EARLY ELEMENTARY	LATE ELEMENTARY	MIDDLE/JUNIOR HIGH SCHOOL	EARLY HIGH SCHOOL	LATE HIGH SCHOOL
17.A.1a Identify physical characteristics of places, both local and global (e.g., locations, roads, regions, bodies of water).	17.A.2a Compare the physical characteristics of places including soils, land forms, vegetation, wildlife, climate, natural hazards.	17.A.3a Explain how people use geographic markers and boundaries to analyze and navigate the Earth (e.g., hemispheres, meridians, continents, bodies of water).	17.A.4a Use mental maps of physical features to answer complex geographic questions (e.g., how physical features have deterred or enabled migration).	17.A.5 Demonstrate how maps, other geographic instruments and technologies are used to solve spatial problems (e.g., land use, ecological concerns).

17.B.1a Identify components of the Earth's physical systems.	17.B.2a Describe how physical and human processes shape spatial patterns including erosion, agriculture and settlement.	17.B.3a Explain how physical processes including climate, plate tectonics, erosion, soil formation, water cycle, and circulation patterns in the ocean shape patterns in the environment and influence availability and quality of natural resources.	17.B.4a Explain the dynamic interactions within and among the Earth's physical systems including variation, productivity and constructive and destructive processes.	17.B.5 Analyze international issues and problems using ecosystems and physical geography concepts.
17.B.1b Describe physical components of ecosystems.	17.B.2b Explain how physical and living components interact in a variety of ecosystems including desert, prairie, flood plain, forest, tundra.	17.B.3b Explain how changes in components of an ecosystem affect the system overall.	17.B.4b Analyze trends in world demographics as they relate to physical systems.	

C. Understand relationships between geographic factors and society.

EARLY ELEMENTARY	LATE ELEMENTARY	MIDDLE/JUNIOR HIGH SCHOOL	EARLY HIGH SCHOOL	LATE HIGH SCHOOL
17.C.1a Identify ways people depend on and interact with the physical environment (e.g., farming, fishing, hydroelectric power).	17.C.2a Describe how natural events in the physical environment affect human activities.	17.C.3a Explain how human activity is affected by geographic factors.	17.C.4a Explain the ability of modern technology to alter geographic features and the impacts of these modifications on human activities.	17.C.5a Compare resource management methods and policies in different regions of the world.

	17.D.2b Identify different settlement patterns in Illinois and the United States and relate them to physical features and resources.	17.D.3b Explain how interactions of geographic factors have shaped present conditions.		

STATE GOAL 16: Understand events, trends, individuals and movements shaping the history of Illinois, the United States and other nations.

Why This Goal Is Important: George Santayana said "those who cannot remember the past are condemned to repeat it." In a broader sense, students who can examine and analyze the events of the past have a powerful tool for understanding the events of today and the future. They develop an understanding of how people, nations, actions and interactions have led to today's realities. In the process, they can better define their own roles as participating citizens.

STATE GOAL 18: Understand social systems, with an emphasis on the United States.

Why This Goal Is Important: A study of social systems has two important aspects that help people understand their roles as individuals and members of society. The first aspect is culture consisting of the language, literature, arts and traditions of various groups of people. Students should understand common characteristics of different cultures and explain how cultural contributions shape societies over time. The second aspect is the interaction among individuals, groups and institutions. Students should know how and why groups and institutions are formed, what roles they play in society, and how individuals and groups interact with and influence institutions.

A. Compare characteristics of culture as reflected in language, literature, the arts, traditions and institutions.
