Standards of Learning:
History and Social Science

Meeting curriculum standards is a major focus in education today. This document highlights the correlation of InspireData® with the History and Social Science Standards of Learning.

The InspireData Standards Match is designed to demonstrate the many ways InspireData supports the standards and to give educators ideas for using this tool to meet learning goals across the curriculum.

How to read the InspireData Standards Match:

- Yellow highlight indicates a standard or objective that is supported by the use of InspireData.
- Green note annotation includes the names of a InspireData template that corresponds to the highlighted standard. These templates are a part of the software program and act as starters or frameworks for student work.

These standards enable students to cover history and geography from 1500 A.D. to the present, with emphasis on Western Europe. Geographic influences on history continue to be explored, but increasing attention is given to political boundaries that developed with the evolution of nations. Significant attention will be given to the ways in which scientific and technological revolutions created new economic conditions that in turn produced social and political changes. Noteworthy people and events of the nineteenth and twentieth centuries will be emphasized for their strong connections to contemporary issues.

Historical understanding, however, requires students to engage in historical thinking, to raise questions and to marshal evidence in support of their answers. Students engaged in historical thinking draw upon chronological thinking, historical comprehension, historical analysis and interpretation, historical research, and decision-making.
