

**Date:** 2/21/2008  
**Name of Product:** InspireData™ 1.5  
**Contact for more information:** <http://www.inspiration.com>

**Summary Table**  
**Voluntary Product Accessibility Template**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
Section 1194.21 Software Applications and Operating Systems	Supported. Please refer to the attached VPAT.	
Section 1194.22 Web-based internet information and applications	Supported. Please refer to the attached VPAT.	InspireData 1.5 is not a web-based product. InspireData 1.5 does support collecting data via a web-page and the Internet using its e-Survey function.
Section 1194.23 Telecommunications Products	Not Applicable	InspireData 1.5 is not a telecommunications product.
Section 1194.24 Video and Multi-media Products	Not Applicable	InspireData 1.5 is not a video or multi-media product.
Section 1194.25 Self-Contained, Closed Products	Not Applicable	InspireData 1.5 is not a self-contained closed product.
Section 1194.26 Desktop and Portable Computers	Not Applicable	InspireData 1.5 is software as defined under section 1194.21.
Section 1194.31 Functional Performance Criteria	Supported. Please refer to the attached VPAT.	
Section 1194.41 (a) Information, Documentation and Support	Supported. Please refer to the attached VPAT.	

**Section 1194.21 Software Applications and Operating Systems - Detail  
Voluntary Product Accessibility Template**

Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Keyboard access is supported for data entry in Table view. Many InspireData functions including those available through menus and dialogs are keyboard accessible.	InspireData requires the use of a mouse in most cases. The InspireData Help system includes a reference guide for keyboard accessibility.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	InspireData neither disables nor deliberately disrupts the operation of accessibility features. Inspiration Software, Inc. cannot, however, guarantee complete compatibility with all third party or operating system accessibility features.	
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	InspireData shows the focus on screen via outlines around the selected objects in Plot View, or with selection highlights around selected cells, rows, and/or columns in Table View. InspireData does not allow the focus to be set to the toolbars.	InspireData does not programmatically expose the focus.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	InspireData provides textual information about graphical user interface elements.	InspireData user interface elements include, for example, menu bars, toolbars and buttons. Each graphical interface element has an associated tool tip that explains the functionality of the element.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned	InspireData utilizes standard and consistent images throughout the application.	

to those images shall be consistent throughout an application's performance.		
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	InspireData uses a custom text editing environment, so it cannot make available this information.	InspireData does not provide textual information through operating system functions.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	InspireData does not override user selected contrast and color selections or other individual display attributes.	InspireData does not support large font mode in buttons or dialogs where large fonts would render the button or dialog impossible to read. However, the operating system magnifier is available to magnify button or dialog text.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	InspireData displays animation when a change made to a plot causes icons to move, but is always used as a transient display between the two states. Animated time series plots can be displayed statically at each interval.	
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	InspireData does not use color as the only means to convey information. InspireData can use color to add additional meaning to a plot.	Any element that uses color to convey information also uses an alternate means, such as a tool tip, to convey the same information.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	InspireData provides a color palette with a wide range of colors and contrasts.	
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	InspireData does not use flashing or blinking text, objects or other elements.	
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field	InspireData is not a web application.	InspireData does have one function, the e-Survey, which utilizes a web-page and the Internet. Assistive Technology

elements, and functionality required for completion and submission of the form, including all directions and cues.		can be used to access the information, field elements, and functionality required for completion and submission of the form.

**Section 1194.22 Web-based Internet Information and Applications - Detail  
Voluntary Product Accessibility Template**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	A text equivalent for every non-text element is provided on the e-Survey web-page(s).	InspireData is not a web-based application. InspireData does have one function, the e-Survey, which utilizes a web-page and the Internet.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not Applicable	InspireData does not support multimedia.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	InspireData's e-Survey function is designed so that all information conveyed with color is also available without color, for example from context or markup.	
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	InspireData's e-Survey function does not require an associated style sheet.	
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable	InspireData does not utilize image maps.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not Applicable	InspireData does not utilize image maps.
(g) Row and column headers shall be identified for data tables.	Not Applicable	InspireData's e-Survey function does not utilize data tables.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Not Applicable	InspireData's e-Survey function does not utilize data tables.
(i) Frames shall be titled with text that facilitates frame identification and navigation.	Not Applicable	InspireData's e-Survey function does not utilize frames.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	InspireData's e-Survey function avoids causing the screen to flicker with a frequency greater than 2Hz and lower than 55 Hz.	
(k) A text-only page, with equivalent information or functionality, shall be provided to	The InspireData e-Survey function is a text-only page.	

make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.		
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by assistive technology.	Not Applicable	InspireData does not use scripting languages to display primary content or interface elements.
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	Not Applicable	InspireData's e-Survey function does not utilize plug-ins or applets.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	InspireData neither disables nor deliberately disrupts the operation of accessibility features. Inspiration Software, Inc. cannot, however, guarantee complete compatibility with all third party or operating system accessibility features.	Labels in InspireData's e-Survey function appear immediately adjacent to their respective input fields.
(o) A method shall be provided that permits users to skip repetitive navigation links.	InspireData's e-Survey function does not contain repetitive navigation links.	
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not Applicable	InspireData's e-Survey function does not require a timed response.

**Section 1194.31 Functional Performance Criteria - Detail  
Voluntary Product Accessibility Template**

Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	InspireData does not support assistive technologies for the visually impaired.	
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	InspireData does not support assistive technologies for the visually impaired.	
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	InspireData does not require user hearing to operate the application or retrieve information.	
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	InspireData does not require user hearing to operate the application or retrieve information.	
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	InspireData does not require user speech to operate the application or retrieve information.	
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	InspireData supports operating system tools such as StickyKeys and FilterKeys as well as other assistive technologies.	

**Section 1194.41 Information, Documentation, and Support - Detail  
Voluntary Product Accessibility Template**

Section 1194.41 (a) Product Support Documentation	InspireData documentation is provided in both printed and digital format.	
Section 1194.41 (b) Accessibility and Compatibility Features	InspireData includes extensive Help file documentation listing accessibility information at no extra cost. A list of keyboard shortcuts is also provided in the Help file.	
1194.41 (c) Support Services	<p>Inspiration Technical Support is familiar with such features as keyboard access and other options important to people with disabilities.</p> <p>Technical Support is available Monday through Friday 8:00 A.M. to 5:00 P.M. PST by calling 503-297-3004. Technical Support can also be reached by email at <a href="mailto:techsupport@inspiration.com">techsupport@inspiration.com</a>.</p>
